

**LAND ALTERATION PERMIT**

**GENERAL PROVISIONS**

1. Permittee shall maintain temporary erosion controls at all times during construction in order to prevent erosion into any adjacent water body or watercourse. Temporary erosion controls comprise strawbales, straw mulch, pollution curtains, filter cloth and the like.
2. Permittee shall install permanent erosion control measures in order to prevent erosion of disturbed soils from the project site onto adjacent parcels of land, public waters, public roads, ditches, sewer facilities and the like. Permittee shall cease all related authorized construction activities until such time as any such problem is corrected as agreed to by the permitting authority. All permanent erosion control measures shall be installed within seven (7) days of completion of final grading or the termination date of this permit, whichever comes first.
3. No changes in plans or specifications can be made to the work authorized herein unless such change is first approved in writing by the permitting authority.
4. Permittee shall grant access to the site at all reasonable times so that the permitting authority or his/her agents may conduct inspections to ascertain compliance with the terms and conditions of this permit.
5. The construction site shall be kept reasonably free of debris at all times so as to not create a public nuisance.
6. The granting of this permit does not exempt the permittee from having to secure other permits from other state, federal or local units of government which may have jurisdiction over portions of the authorized project.
